Your Application ID: SEA-8201

Dear Mr Kumar,

Outcome of your pre-assessment application

Thank you for submitting your application for a pre-assessment, in preparation to obtain a New Zealand MEC2

Maritime New Zealand has assessed the sea service you provided against the requirements of this certificate. It has been determined that the sea service outlined below **is acceptable** to meet the requirement of 12 months on vessels of > 750kW or more operating beyond restricted limits as an officer in charge of engineering watch for this certificate.

- The time provided on *Viveka* and *Biskra* between 18/05/2017 and 08/08/2018 (18 months and 21 days) meets the requirements of vessels > 750kw, operating beyond restricted limits while as an officer in charge of engineer watch.

Please be advised that although you currently meet this requirement, when you make an application for the MEC2 certificate, your sea service must remain within the 10-year period preceding the date of that application. Please include a copy of this letter when you make your application.

If you have any further queries about Seafarer certification, please contact us via the email address below, or call us on 0508 732 237.

Yours sincerely

Brittni Evans
